

WARNING

DANGER - ULTRAVIOLET RADIATION

Follow Instructions.

Avoid too frequent or too lengthy exposure. Like exposure to the sun, use of a tanning device can cause eye and skin injury and allergic reactions. Repeated exposure can cause chronic sun damage, which is characterized by wrinkling, dryness, fragility and bruising of the skin, and skin cancer.

**WEAR FOOD AND DRUG ADMINISTRATION-
APPROVED PROTECTIVE EYEWEAR.
FAILURE TO WEAR PROTECTIVE EYEWEAR
MAY RESULT IN SEVERE BURNS OR LONG-
TERM INJURY TO THE EYES.**

Ultraviolet radiation from tanning devices will aggravate the effects of the sun, so do not sunbathe during the twenty-four hours immediately preceding or immediately following the use of a tanning device.

Medications and cosmetics may increase your sensitivity to ultraviolet radiation. Consult a physician before using a tanning device if you are using medications, have a history of skin problems, or believe that you are especially sensitive to sunlight. Women who are pregnant or using birth control pills and who use a tanning device may develop discolored skin.

If your skin does not tan when exposed to sun, it is unlikely that your skin will tan when exposed to this tanning device.
